How do I choose a good inverter?

1) Sizing the right power output. Inverters will be rated by a wattage value, telling you how many watts they can run at one time. For example, imagine you had a 500 Watt Fridge and 800 Watt Air Conditioning. These two items would be 1300 Watts and would require an inverter with a higher wattage than 1300W.

How do I choose a renogy inverter?

Renogy 2000W and 3000W inverter will meet your power needs. 2) Check your battery voltage. The DC voltage rating on the inverter will tell you what battery bank it is compatible with. For example, a 12V battery bank will require an inverter that is compatible with 12V DC input. 3) Size your installation spaces.

Does renogy inverter have remote control?
