

## Dutch energy storage lithium batteries are safe and reliable

Why is the Netherlands focusing on battery electricity storage?

In order to meet its ambitious CO2 reduction targets and minimise the country's dependence on Russian fossil fuels, the Netherlands is now more focused than ever in the development of battery electricity storage.

What is the Moerdijk battery storage system?

Marinus Tabak, COO of RWE Generation and RWE Country Chair for the Netherlands, said: "With the Moerdijk battery storage system, we are pioneering grid-forming technologies as alternatives to traditional solutions such as power stations. This offers a pathway to a more sustainable yet reliable energy future.

Why is energy storage important in the Netherlands?

Energy storage can play a key role in contributing to solutions for shortages of capacity on the grid. It is therefore no surprise that we have seen the appetite for large-scale battery energy storage systems growing in the Netherlands.

What are the transport rules for lithium-ion batteries in the Netherlands?

The following rules apply to the transport of lithium-ion batteries within the Netherlands: ADR: ADR (Accord européen relatif au transport international des marchandises dangereuses par route): Transport must comply with this European regulation, with specific requirements for packaging, labeling, and documentation.

Are lithium-ion batteries safe?

Lithium-ion batteries are essential in many modern technologies, but they also pose significant safety risks, such as fire and explosion. Therefore, a comprehensive set of laws and guidelines have been developed in the Netherlands to ensure the safe production, storage, transportation and use of lithium-ion batteries.

Will net metering boost home battery storage in the Dutch market?

The envisaged gradual phase-out of net-metering scheme, beginning in 2025, is expected to boost home battery storage in the Dutch market. In order for certain environmentally harmful activities to be performed, Dutch law requires an environmental permit to be obtained by the developer.
