

Jamaica s latest policy on new energy storage

Why is energy storage important in Jamaica?

Jamaica is committed to reducing its dependence on imported fossil fuels. The country's National Energy Policy sets an ambitious target: 50% of electricity from renewable sources by 2037. Energy storage plays a critical role in achieving this target. Key policy support includes:

What is Jamaica's energy policy?

Jamaica's National Energy Policy 2009 - 2030calls for Jamaica to realize its energy resource potential through the development of renewable energy sources and enhance its international competitiveness, energy security whilst reducing its carbon footprint. This is further emphasized in Goal 3 of that policy.

How can battery energy storage help Jamaica?

Battery energy storage systems (BESS) are now emerging as a cornerstone technology to address these challenges--helping Jamaica stabilize its grid, unlock more renewable energy, and reduce electricity costs for both consumers and businesses. The country's electricity cost can reach as high as \$0.32 per kilowatt-hour, far above global averages.

How does Jamaica achieve energy security?

Government of Jamaica (GOJ) to achieving energy security. These are policy responses to the fact that Jamaica, having no fossil fuel resources, relies on imported oil to meet approximately 91% of its energy needs with renewables (hydro, wind, solar and biomass) making up the other 9%.

Will JPS build a solar power plant in Jamaica?

Power utility Jamaica Public Service Company, JPS, is investing US\$300 millionto construct Jamaica's largest solar power plant and a battery storage facility, starting this month. The renewable energy facility will replace JPS's aged Hunts Bay...

Why should a company invest in battery storage in Jamaica?

By integrating battery storage with rooftop solar systems or hybrid microgrids, Jamaican companies can maximize renewable use while gaining financial savings and branding advantages. Beyond the city centers, many Jamaican communities live in remote or coastal areas with limited access to stable electricity.
