

## **Maldives Energy Storage Planning**

What is solar power development & energy storage solution in Maldives?

Maldives: Solar Power Development and Energy Storage Solution. Project team to closely monitor the macroeconomic situation with the government during project implementation. The project itself as well as development partner financing including IMF Rapid Credit Facility support will help the Government of Maldives weather the risk, BESS.

What is the energy storage roadmap for Maldives?

The Energy Storage Roadmap for Maldives study recommends that a four-hour lithium-ion batterywill be the primary storage technology installed in Maldives. 44. Floating solar PV forms part of the pipeline of IPP projects envisioned under component 1 and is an integral part of the project that can help address the land availability issue.

What is the Maldives solar project?

The project involves the development of a 36-megawatt(MW) solar power project and 50 megawatt hours (MWh) of battery energy storage solutions across various selected islands in the Maldives. The project also involves grid modernization to integrate variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

Can solar PV & battery storage be implemented in Maldives?

To this end, World Bank financed the "Energy Storage Roadmap for Maldives" 12 with support from the World Bank's Energy Sector Management Assistance Program (ESMAP) to assess the techno-economic feasibility of enabling solar PV and battery storage in Maldives.

How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

What are the investment needs of Maldives?

Investment Needs. Investments over USD300 millionwill be required to achieve the SAP 2019-2023 renewable target set by Government of Maldives,including: (i) USD60 million-USD90 million to procure solar PV,(ii) USD60 million-USD90 million for battery energy storage systems (BESS) and (iii) USD75 million-USD120 million in grid upgrades.
