Are outdoor power strips weather resistant?

Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

How do I protect my home from a power outage?

Consider installing southwire wires securely along walls using cable covers,or overhead where possible. Utilize GFCIs: When using appliances outdoors,use Ground Fault Circuit Interrupters(GFCIs) that can immediately cut off power in case of a fault thereby enhancing safety against shock occurrence.

Are outdoor power strips Wi-Fi Ready?

Some outdoor power strips are Wi-Fi ready, allowing them to connect to your home network. These smart power strips can be controlled via a smartphone app, which is ideal for turning on and off holiday lighting displays.

Do extension cords need to be rated for outdoor use?

Among other things the National Electrical Code (NEC) prescribes rules regarding wire insulation, gauge and ampacity that would allow cords deal with the required electric load without getting hot. Look for extension cords rated for at least 600 voltswhen using them outdoors.
