

Outdoor power supply with small battery

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptopsor be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

Should you buy a power brick or a portable power station?

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

Do you need a portable power station for a camping trip?

If you're planning for a camping trip but don't want to completely rough it, then a portable power station can help. The DJI Power 1000 stores 1,024 watt-hours of electricity and produces 2,600 running watts and up to 4,400 surge watts.
