

Philippines off-grid energy storage battery brand

How much is an off-grid Solar System worth in the Philippines?

In comparison with a grid-tied system, an off-grid solar system's price increases remarkably, with a minimum of 30%. 1kWh of solar energy is worth PHP 9-11in the Philippines. If the 1kWh is stored in a solar battery, it can only supply around 70% of the stored 1kWh back to your appliances due to physical losses.

What is energy storage battery?

The startup's flagship product known as the Energy Storage Battery is designed to provide affordable and sustainable power supply to those living in off-grid locations. It is equipped with a solar panel, battery and inverter unit that can provide power for up to three hours per day.

Why do Filipinos want to be independent of the grid?

But with a majority of the Philippine provinces experiencing both scheduled rotational blackouts as well as sudden power outages, coupled with one of the highest electricity rates in Asia, many Filipinos want the choice of being independent of the grid and solely generate their own electricity needs from the sun.
