

## Replacement of battery cabinet in computer room

### What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accomodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

#### Can a battery be installed in a computer room?

Sometimes they are installed in the same room as the UPS (i.e., electrical equipment room). Local or regional codes may dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g, up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets.

#### Why do you need a battery cabinet?

Ease of useis one of the principle selling points for battery cabinets. It is convenient to service the equipment when the UPS and the battery (ies) are right next to each other. Conversely, it is inconvenient to have to go to a separate room when open-rack batteries are installed.

#### Do battery cabinets need to be locked?

Battery cabinets must enclose the batteries behind locked doors accessible only to authorized personnel. As long as the cabinets are kept locked, they can be located in a computer room or other rooms accessible by non-battery technicians.

#### Can you put a battery in an electrical room?

Local or regional codesmay dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g,up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets. The UPS and/or battery cabinets might be configured to look like standard computer equipment racks.

#### How do I set up an UPS battery room?

Open-rack battery rooms must be adjacent to the UPS room. Battery cabinets must be adjacent to the UPS equipment. Cable lengths from multiple cabinets should be kept as nearly identical as possible to prevent voltage drop variations. One cabinet should be able to hold at least one complete string of cells.

Isolates the battery cabinet from the UPS Divides the 540VDC battery string into two (2) battery strings of 270VDC each. Unlocks the battery cabinet doors to allow access to the cabinet ...
