

## **Targeting 5G base station manufacturers**

Why is the 5G base station market growing?

The surging demand for high-speed connectivity a significant factor driving the growth of the 5G base station market. In terms of region, Asia Pacific was the largest revenue generating market in 2023. In terms of segment, hardware accounted for a revenue of USD 33,472.5 million in 2023.

Where is the 5G base station market located?

North Americarepresents a significant market for 5G base stations, commanding approximately 22% of the global market share in 2024. The region's strong position is driven by extensive 5G infrastructure deployments across the United States and Canada, supported by robust telecommunications infrastructure and high consumer adoption rates.

Which 5G base station market dominated the global market in 2023?

The Asia Pacific 5Gbase station marketdominated the global market in 2023 and accounted for 32.67% of the revenue share.

How big is the 5G base station chips market?

The United States 5G Base Station Chips market size was valued at US\$912.4 millionin 2024 and is projected to reach US\$1.85 billion by 2030,at a CAGR of 12.5% during the forecast period 2024-2030. 5G Base Station Chips are specialized semiconductor components designed to power the hardware of 5G base stations.

Why are 5G base station chips so expensive?

Designing and manufacturing advanced 5G base station chips involves significant R&D and production costs. This financial burden can hinder the entry of smaller players and limit market expansion.

How many 5G base stations are there in China?

The market is witnessing significant developments in base station technology and deployment strategies. By September 2023, China had built 3.189 million 5G base stations, with 22.6 5G stations per 10,000 people, demonstrating the scale of infrastructure deployment possible.
