

## The latest technology in the energy storage container industry

What is Container Technologies Industries, LLC?

Container Technologies Industries, LLC (CTI) is a metal fabricator dedicated to serving the Nuclear and Commercial Utilities Industries. It has been in business since December, 1999.

What are the different types of stationary energy storage technologies?

Stationary energy storage technologies broadly fall into three categories: electro-chemical storage, namely batteries, fuel cells and hydrogen storage; electro-mechanical storage, such as compressed air storage, flywheel storage and gravitational storage; and thermal storage, including sensible, latent and thermochemical storage.

How many energy storage projects are in the pipeline?

In response to rising demand and the challenges renewables have added to grid balancing efforts, the power industry has seen an uptick in energy storage project activity, with more than 4,000 storage projects in the pipeline globally, according to GlobalData. Why do we need energy storage solutions?

As the global energy transition accelerates, the need for reliable, scalable and cost-effective energy storage solutions has never been greater.
