

Use of portable energy storage batteries in Kenya

Who is the implementing agency for the Kenyan battery energy storage system?

The Kenya Electricity Generating Company PLC(KenGen),has been designated to be the Implementing Agency for the Kenyan Battery Energy Storage System (BESS),which is part of the Kenya Green and Resilient Expansion of Energy (GREEN) program,funded by the World Bank.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) have emerged as a pivotal solution, storing excess solar energygenerated during the day for use at night or during periods of high demand. Storage batteries can also be integrated with existing grid power to stabilise use between peak and off-peak usage.

Why should you install a battery storage system?

Properly installed battery systems promote energy independenceby allowing excess energy to be stored and used locally, thereby reducing strain on the primary power grid. Various battery storage systems are available today, each with distinct advantages and applications.

What is battery storage & how does it work?

Storage batteries can also be integrated with existing grid power to stabilise use between peak and off-peak usage. Beyond reliability, battery storage reduces reliance on fossil fuels by making renewable energy more viable and lowering carbon emissions associated with traditional power generation.
