

# Vaduz New Energy BIPV Solar Panel Assembly

What is building integrated photovoltaic (BIPV) facade system?

This is where Building Integrated Photovoltaic (BIPV) facade systems emerge as an option to achieve a sustainable built environment. To learn more about SolarLab and its solutions, visit their website or refer to the product catalog. Cite: Enrique Tovar.

### What is a BIPV solar system?

Recent years have witnessed remarkable advances in breakthrough solar technologies, particularly in efficiency and aesthetics. Modern BIPV solutions now include color-customizable panels, solar glass that maintains transparency while generating power, and ultra-thin photovoltaic films that can be integrated into various building materials.

# How much solar energy does Vaduz produce a day?

In summer months, Vaduz experiences peak solar energy production with an average daily yield of 5.71 kWh/kWdue to longer daylight hours and higher sun position in the sky. The energy production slightly drops in spring to an average daily output of 4.85 kWh/kW as sunlight duration decreases gradually.

# How does SolarLab help design a BIPV facade?

In this collaborative process, Solar Lab contributes by providing design support and free CAD and BIM tools, making it easier for designers to make decisions when incorporating BIPV facades into the design. In this context, solar facade systems add a new dimension.

#### What is a BIPV module?

Maximum design freedom for ventilated façades BIPV modules can be a key design feature in ventilated façades as well as performing a protective function by shielding the ventilated sections of the building against the weather. Double-glazed modules are used in ventilated façades, such as Schüco AF VC.

#### What is a PV module?

First and foremost, a PV module consists of interconnected solar cellsthat lie between a front and rear glass panel. A wide variety of cell and glass options provides a high degree of architectural freedom for a suitably unique building design.

As the capital of Liechtenstein, Vaduz has become a focal point for new solar photovoltaic panel installations. With 78% of its electricity already sourced from renewables, the city now aims to ...
