

Angola Energy Storage Project Budget

Will Angola's new solar infrastructure provide sustainable electricity to 1 million people?

The new solar infrastructure will provide sustainable electricity to 1 million people. Angola's Ministry of Finance has secured EUR1.29 billion from Standard Chartered to finance the construction of 48 hybrid PV systems across the Angolan provinces of Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje.

How much solar power does Angola have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Angola had 297 MW of installed PV capacity at the end of 2022. By 2025, the African nation aims to reach an access rate of 65% and a total installed capacity of approximately 10 GW.

How can Angola increase its power generation capacity?

Angola is working hard to increase its power generation capacity by boosting hydro and solar energy, as well as linking and expanding its electric grids. This will create more sustainable income sources, promote the global energy transition, increase the country's exports and modernise the economic possibilities of its citizens.

Will Angola have its largest solar project ever?

By 2026, Angola expects to have its largest solar project ever. In June 2023, the Export-Import Bank of the United States of America qualified a record USD 900-million loan to build two solar facilities with a combined capacity of 500 MW in the provinces of Malanje and Luanda.

Can Angola build a minigrid?

Angola's Ministry of Finance has secured EUR1.29 billion from Standard Chartered to finance the construction of 48 hybrid PV systems across the Angolan provinces of Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje. The minigrid systems have a combined capacity of 296 MW of solar, with energy storage in lithium-ion batteries of 719 MWh.

What will Angola's energy policy look like in 2027?

The Angolan government's focus is shifting towards the inclusion of more renewable energy sources and enhancing domestic electrification. Expected installed capacity by 2027: 9.64 GW Targeted electrification rate by 2027: 50% Planned proportion of green energy in Angola's energy mix by 2025: 77%
