

BESS prices for photovoltaic panels in the Philippines

How much does a photovoltaic panel cost in the Philippines?

The Philippines photovoltaic market is dominated by Asian producers of PV panels, whose panels are usually cheaper than their European counterparts. The most popular brands include Longi, Jinko, Trina Solar and Risen. Their 300-watt panels usually cost Php 7,068 to Php 11,308.

How much does a 300 watt photovoltaic panel cost?

The prices of photovoltaic panels vary greatly and depend on many factors, such as the power of the panel, its efficiency and the reputable manufacturer. The average price of a 300 Wp photovoltaic panel in 2024 starts from Php 7,068. Of course, the higher the quality and more efficient the panel, the higher its price will be.

How to choose a photovoltaic panel?

When choosing photovoltaic panels for your installation, it is worth paying attention to three basic panel parameters: In addition, the dimensions of the panel (optimal 60 or 72 cells), its certificates and resistance to extreme weather conditions are also important.

How many photovoltaic panels do I Need?

On this basis, the appropriate power and number of photovoltaic panels are selected. For an example single-family house with an area of 150 m², you usually need 8-12 panels with a total power of 3-5 kW. Such an installation will cover approximately 70-90% of electricity demand and will save up to Php 42,000 to Php 60,000 per year.

How long does a photovoltaic installation last?

Installing a PV installation is undoubtedly a significant expense, but it pays off over time. Typically, the payback period for a photovoltaic investment is from 5 to a maximum of 8 years. It all depends on the system parameters and its efficiency in generating free energy.
