

Cambodia Mobile Energy Storage Power Supply

What is the primary energy supply in Cambodia?

1. 5. The total primary energy supply in Cambodia was about 4.8 million tons of oil equivalent in 2015. 8 Fuel wood and other biomass accounted for an estimated 44.4% of the total, oil and petroleum products for 38.5%, coal for 10.7%, hydropower for 3.6%, and electricity imports for 2.8%.

Can solar power be used in Cambodia?

Renewable energy, particularly solar, holds great promise for Cambodia. However, the intermittent nature of solar energy benefits from robust storage solutions to store excess generation and provide power during low solar output periods, like the dry season.

Why is Cambodia's energy sector a success story?

Cambodia's energy sector has been a tremendous success story over the last 20 years. From experiencing frequent power cuts and limited regional electricity access in 2004 to a stable grid in the capital, Phnom Penh, and a village electrification rate of over 98%.

How much money does Cambodia need to build a power plant?

Cambodia requires an estimated \$9 billion investment to develop new power plants and expand the national grid. Between 2022 and 2025, \$2.5 billion has already been approved for key energy projects. Opportunities for investment include:

Why is BESS a good investment for Cambodia?

BESS can provide much needed grid stabilisation, reliability, decarbonisation while also reducing imported power. As battery storage demand and investment continues to grow, Cambodia is well-positioned to build a reliable, low cost, sustainable energy system for the future.

How much energy will Cambodia invest in 2024-2029?

The RGC approved on Sept. 23 last year power investment projects worth in total US\$5.79 billion for 2024-2029, aiming at addressing the energy shortage. The projects will increase Cambodia's share of clean energy generation capacity to 70 percent by 2030 from more than 62 percent at present, according to the ministry. Source: akp.gov.kh
