

China Hybrid Energy and Huawei cooperate to build hybrid power supply for 5G base stations

Why is Huawei a leader in the development of 5G?

With the aim of achieving ubiquitous green connectivity and computing, Huawei is a leader in the digitalization of site power. It works with the telecommunications industry to explore and drive the development of 5G based on the concept of simple, intelligent, and green.

How does Huawei's 5G power work?

Huawei's 5G Power uses AI to enable communication and real-time connectivity, and the global management of grid power, energy storage, temperature control, and loads. These capabilities achieve green connectivity and computing, saving energy across three layers: modules, sites, and the network.

How many 5G sites will China Tower build in 2022?

China Tower planned to build or retrofit about 2 million 5G sites between 2019 and 2022. An estimated 800,000 of these sites will adopt Huawei's 5G Power solution, eliminating 900 million kg in carbon emissions every year, helping to realize targets for green power grids for the 5G era.

How Huawei is accelerating the digital transformation of base stations?

Huawei is accelerating the digital transformation of base stations by adopting AI and IoT. Harnessing these digital technologies, 5G Power optimizes coordinated scheduling between various systems, such as power supply modules, site hardware, and the network.

What is 5G power?

A joint innovation between China Tower and Huawei, 5G Power is a key advancement that will promote the maturity of the 5G power industry by introducing a new approach to the power model for 5G sites. In 2019, the 5G Power solution won ITU's Global Industry Award for Sustainable Impact.

What is Huawei 5G power BoostLi energy storage system?

With the Huawei 5G Power BoostLi energy storage system, Huawei has unlocked greater potential in site energy storage systems. The system provides a three-tier architecture comprising local BMS, energy IoT networking, and cloud BMS.

China Hybrid Energy and Huawei cooperate to build hybrid power supply for 5G base stations
