

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid*The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. *The system can hold 9.45 MWh of energy, three times the size of the CEZ battery in Tusimice.

How does the Czech TCTF work?

The Commission found that the Czech scheme is in line with the conditions set out in the TCTF. In particular, the aid will be (i) granted through a competitive bidding process open to all technologies; (ii) limited to 50% of eligible costs of a project; and (iii) granted no later than 31 December 2025.
