

Disadvantages of using solar power for home use in Thailand

What are the disadvantages of solar energy?

So, let's have a close look at the 10 biggest disadvantages of solar energy. 1. Lack of Reliability Solar energy is far from being reliable compared to other energy sources like nuclear, fossil fuels, natural gas, etc. Since solar energy depends on sunlight, it can only produce energy in the daytime.

Can you install a solar electric system in Thailand?

Because of all the sunlight in Thailand, solar electric systems can supply as much power as you need. Solar electric systems are expensive up front but pay for themselves later on. You must apply for a permit with local authorities to install a solar electric system at your home.

How much does a solar electric system cost in Thailand?

You must apply for a permit with local authorities to install a solar electric system at your home. There are only a handful of components needed to run a solar electric system. Solar electric systems can cost anywhere from THB100,000 to THB400,000, on average. Why Convert to a Solar Electric System in Thailand?

Are solar panels a bad idea?

While solar energy itself is clean, the production of solar panels and batteries can have environmental drawbacks. Manufacturing these components requires large amounts of energy, often sourced from fossil fuels, which contributes to greenhouse gas emissions.

Is solar energy inefficient and unreliable?

For a country that already uses too much water for farmers, it is nearly impossible to use that much amount of water to produce solar energy. Considering the above-mentioned disadvantages of solar energy, it is safe to say solar energy is inefficient and unreliable.

Is solar energy storage a problem?

Energy storage problems Solar electricity storage is another major argument against it. Since solar energy production depends on solar radiation, and electricity demand is typically higher at night or during bad weather, energy storage systems such as batteries have become a necessity for many solar installations.
