

French home battery BMS solution

What is a battery management system (BMS)?

Our products are delivered all over Europe and all over the world. The BMS (Battery Management System) is the cornerstone of any energy storage system. It provides safety, thermal control, voltage balancing, load management, discharge and information processing of cells in the batteries.

Where are BMS batteries made?

The company HQ and factory are in Bordeaux, up for small and large series production. marine batteries. BMS PowerSafe is the French industrial company of Startec Energy Group. The company has unique expertise in the BMS (Battery Management System) market.

How will BMS technology change the future of battery management?

As the demand for electric vehicles (EVs), energy storage systems (ESS), and renewable energy solutions grows, BMS technology will continue evolving. The integration of AI, IoT, and smart-grid connectivity will shape the next generation of battery management systems, making them more efficient, reliable, and intelligent.

What is BMS powersafe?

The company has unique expertise in the BMS (Battery Management System) market. BMS PowerSafe designs and produces the most secure intelligent on-board solutions in the sector. Its electronic management boards are compatible with all battery technologies, optimising their operation, safety and lifespan.

BMS PowerSafe®: select the best BMS for your batteries. 25 years of experience, french expert in electronics and BMS for lithium batteries. No compromise between performance and security.
