

How long is the life of a portable power bank

How long does a power bank last?

On average a power bank will last between 3-5 years. The lifespan of a power bank depends on how often you use it, the quality of the device, and how you store it when not using it. There are a few things that you can do to exceed its lifespan, and there are a few things that you shouldn't do. We will explain everything you need to know.

How do you calculate a power bank lifespan?

To calculate a power bank's lifespan, we need to consider the amount of energy it can store and the amount of energy required by the device it is charging. Here's a simple formula: $\text{Power Bank Lifespan (hours)} = \frac{\text{Power Bank Capacity (mAh)}}{\text{Device Power Consumption (mA)}}$

What factors affect a power bank's lifespan?

Charging Speed: The speed at which a power bank charges a device can affect its lifespan. Faster charging speeds can reduce the power bank's lifespan. **Power Bank Quality:** The quality of the power bank's components, such as the battery cells and circuitry, can affect its lifespan.

How long do power bank batteries last?

When evaluating the longevity of power bank batteries, both lithium-ion (Li-ion) and lithium polymer (LiPo) have distinct characteristics that influence their lifespans. Generally, both types can last for several years, but their performance can differ based on several factors.

How long does a power bank hold a charge?

Typically, power banks hold their charge for about six months if not being used. This makes them ideal on-hand backup devices to have for emergency situations, like an outage during storm season.

How long does a 20000 mAh power bank last?

For example, 20000mAh power banks have up to 500 charging cycles. You have to charge a phone 6 times for the 20000mAh power bank to complete a charging cycle. If you use it once per day, it will take up to 8 years for a 20000mAh to complete all its charging cycles. However, the power bank has to be from a trusted brand.
