The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How do I finance my solar panels?

Many top solar companies, like Blue Raven Solar, offer other ways to finance your solar panels, including power purchase agreements (PPAs) or some combination of a solar lease and solar loan. A PPA is similar to a solar lease, only an energy company owns and installs the panels, and you pay for the energy produced.

Are solar panels a worthwhile investment?

Yes, solar panels can be a worthwhile investment for many homeowners. Here are a few reasons why: Cost Savings: Most homeowners recover the cost of their solar panels in electric bill savings in about 8.5 years, with an estimated savings of \$25,260 over the system's lifetime.

How much does a solar inverter cost?

Inverter: A solar inverter converts the generated DC electricity into AC electricity that can be used to power your home. The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. Mounting system: This is what holds rooftop solar panels in place.

Should you pay for solar panels in cash?

Paying for your solar panels in cash is the simplest and often the most cost-effective option. No interest, no monthly payments, just a one-time upfront cost. By paying in cash, you avoid finance charges and own your system outright from day one. This means you'll immediately start saving on your electricity bills.
