

Icelandic PV module export requirements

How does Iceland control exports of dual-use items?

Iceland controls exports of dual-use items, i.e. goods, technology or services that can be used for both military and civilian purposes, on the basis of international legal obligations that Iceland is party to.

How do customs procedures affect exporting goods from Iceland?

When exporting goods from Iceland, it is essential for businesses to comply with specific customs procedures to ensure a smooth and effective export process. Understanding these procedures can significantly impact the efficiency of international trade and the timely delivery of products to foreign markets.

What is the purpose of export controls in Iceland?

The purpose of export controls is to prevent dual-use items from being used in violation with Iceland's international legal obligations, including related to international sanctions, humanitarian and human rights law, etc.

What are Iceland's trade regulations?

One of the key elements of trade regulations in Iceland is the nation's membership in the European Economic Area (EEA), which facilitates trade between Iceland and EU member states. This membership not only enables access to one of the largest markets in the world but also imposes certain legislative requirements on businesses.

Do exporters need inspections before leaving Iceland?

It is advisable for exporters to ensure that all information provided is accurate and up-to-date, as discrepancies may lead to delays or penalties. Mandatory inspections might also be required before goods leave Iceland, especially for specific commodities such as pharmaceuticals or agricultural products.

How do tariffs affect international trade with Iceland?

When engaging in international trade with Iceland, it is crucial to understand the various tariffs and duties that apply to imported and exported goods. Tariffs are essentially taxes imposed by the government on goods brought into the country, which can significantly impact the overall cost of importing.
