

Ireland hybrid energy storage project investment

What is Siemens Energy's 'hybrid grid stabilization & large-scale battery storage plant'?

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time these two technologies have been combined into one, single grid connection to stabilize the grid and make better use of renewable energy. Green energy for 9500 households

What is Ireland's energy storage strategy?

As part of the energy storage strategy, identify Ireland's competitive advanced capabilities such as our renewable and digital technologies sector and how these can be leveraged to create additional adjacent job opportunities. Promote public and private sector participation in EU and international research and skills development programmes.

Is Ireland a good place to invest in energy storage?

Ireland has been one of the early movers in the European energy storage market along with the UK, with grid frequency response markets providing secure revenue services for projects. According to consultancy Delta-EE, it will have 1,400MW of BESS installed by the end of 2022 with 600MW coming online over the course of the year.

Is energy storage a problem in Ireland?

"A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge. Energy storage has the opposite problem to the wind industry where planning is an obstacle but the route to market is there.

How much battery storage do we need in Ireland & Northern Ireland?

In 2021 energy experts Baringa estimated that to hit the 80 per cent renewable electricity targets in Ireland and Northern Ireland by 2030 we would need at least 1,700 MW of battery storage on the island of Ireland. Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power.

Does Ireland need an end-to-end energy storage strategy?

Policy evolution is needed to support the development of the energy storage sector throughout the value chain, from R&D and product development through to project delivery and operation. To support this, Ireland needs an end-to-end energy storage strategy that can support the development of the sector.
