

# Lithuania Solar Power Supply System

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

How many solar power plants are there in Lithuania?

As of 2012, Lithuania has 1,580 small (from several kilowatts to 2,500 kW) solar power plants with a total installed capacity of 59.4 MW which produce electricity for the country, and has an uncounted number of private power plants which make electricity only for their owners.

Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.

Is Lithuania a net energy importer?

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy. Long-term aims were defined in the National Energy Independence strategy in 2012 by Lietuvos Seimas.

Does Lithuania have a wind power plant?

Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania. With installed wind capacity of 178 MW in 2016, and an average power consumption of 1.1 GW, Lithuania was the EU Member State with the highest level of new wind capacity installed in 2016 relative to its power consumption.

6 days ago; The construction of the largest on-site photovoltaic installation in Lithuania is nearing its final stages. ORLEN Lietuva, a subsidiary of the ORLEN Group, is wrapping up its first solar ...
