

Pakistan's solar panels and photovoltaic panels

By 2025, the photovoltaic (PV) market in Pakistan is poised for exponential growth, offering opportunities for investors, developers, and communities. This report explores the key drivers, ...

Pakistan's solar energy boom, which accelerated in 2023 due to falling global solar panel prices and increased imports from China, led to widespread adoption of solar systems among wealthier individuals and farmers, often supported by government subsidies. Many of these users disconnected from the national electricity grid, concentrating the financial burden of maintaining fossil fuel-based power plants and aging infrastructure on a shrinking pool of grid-connected co...
