

Photovoltaic container house design

What are container homes?

Container homes are dwellings made from steel shipping containers. Originally used to transport goods, these containers are repurposed for housing. They offer several advantages like durability, cost-efficiency, and sustainability. The primary material for container homes is corten steel.

Are shipping container homes a hallmark of architectural innovation?

In an interview with dwell, Taynr stated that they believe shipping container homes to be hallmarks of architectural innovation. Since shipping containers are modular in design and can be transported easily, they are extremely practical for harsh weather conditions.

Are container homes a trend?

Container homes are not just a trend—they're a sustainable, cost-effective alternative to traditional housing. With a bit of creativity and some elbow grease, we can transform shipping containers into stylish, functional living spaces. Container homes are dwellings made from steel shipping containers.

What is a shipping container home?

This simple yet modern shipping container home found on Container for Storage was built using two 40-foot-long containers aligned next to each other. The use of two large shipping containers results in ample space inside. The interior comprises 2 bedrooms, a full bath, a spacious and open living area, and a kitchen with bar seating.

Who built a shipping container home?

This rather unassuming shipping container home was designed by Modulus for Kam Kasravi and Connie Dewitt. It was built off-site using four High Cube shipping containers. Once the building process was complete, these containers were shipped and assembled in the hills of Felton, Santa Cruz, CA, where Kasravi and Dewitt own a 10.8 acres plot.

What are the different types of container homes?

Individual containers or several combined can create varied layouts. Common concepts include single-container studios and multi-container family homes. Modifications such as cutting for windows and doors enhance livability. Building container homes is generally cheaper than traditional construction.
