

What are the trends in the PV inverter market?

PV Inverter Market Trends Rising demand for storage along with PV systems: The growing demand for battery storage solutions in conjunction with photovoltaic or solar systems is having a substantive impact on the PV Inverter Market.

What is the growth rate of solar PV inverter market in 2024?

By inverter type, central systems commanded 55% revenue share in 2024, while microinverters are projected to register the fastest 8.1% CAGR by 2030. By application, utility-scale installations accounted for 63% of the solar PV inverter market size in 2024, while residential is set to grow at a 7.6% CAGR through 2030.

What is the global PV inverter market share?

A growing number of solar installations in developing nations has also significantly contributed to growth of market in the region. Europe: The PV Inverter Market in Europe holds 10% share in the market and the presence of major players in the region. Figure 1. Global PV Inverter Market Share (%), By Region, 2025

How is the solar PV inverters market segmented?

The solar PV inverters market is segmented by inverter type, application, and geography. By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters.

What drives the PV inverter market?

The PV inverter market is poised to grow significantly over the next five years, driven by declining prices of solar panels and supportive government policies and regulations around the world. Major drivers for the market include countries mandating renewable energy generation targets and incentives for rooftop solar installations.

How much is the PV inverter market worth?

The PV inverter market was valued at USD 25.5 billion, USD 29.9 billion, and USD 34.6 billion in 2022, 2023, and 2024, respectively. The string inverter market is expected to grow at a CAGR of 9.8% between 2025 and 2034 due to their cost-effectiveness, scalability, and ease of installation.

The solar (PV) inverter market is a crucial component of the solar energy industry, responsible for converting the direct current (DC) generated by solar panels into alternating current (AC) that ...
