

# Price of centralized energy storage power station

In 2023 alone, China's large-scale storage system prices halved from  $\text{\$}1.4/\text{Wh}$  to  $\text{\$}0.6\text{--}0.7/\text{Wh}$ , while U.S./European markets saw a 35% dip to  $\text{\$}1.15\text{--}1.3/\text{Wh}$  [1]. But how low can they go? ...
