

Do we have a global dataset of solar power sites?

For the first time, we have access to a globally open dataset of solar power sites worldwide. Four researchers from the University of Southampton published a report in the Nature journal and have worked on the 'Harmonised global datasets of wind and solar farm locations and power' article.

Where is a good location for solar power generation?

Nuremberg, Bavaria, Germany, situated at a latitude of 49.4521018 and longitude of 11.0766654, is a favorable location for solar power generation due to its position in the Northern Temperate Zone.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

How many solar PV locations are there in Germany?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 481 locations across Germany. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Where can I find a list of major solar project data?

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

How is the list of solar projects gathered?

The information in the list was gathered from public announcements of solar projects in the form of company press releases, news releases, and, in some cases, conversations with individual developers. It is not a comprehensive list of all utility-scale projects under development.
