Does South Korea have a battery industry?

But South Korea's battery industry faces mounting pressure from China, whose manufacturers, led by CATL, currently account for nearly 90 percent of global energy storage battery capacity. CATL expanded its footprint in January by establishing a South Korean subsidiary, signaling an aggressive push into the local market.

What is South Korea's Green Energy Plan?

The initiative is closely tied to South Korea's 11th Basic Plan for Electricity Supply and Demand, which outlines an aggressive ramp-up in renewables. The plan aims to boost the share of green energy from 8.4 percent of the national energy mix in 2023 to 29.2 percent by 2038.

How are South Korean companies coping with a global battery slump?

SEOUL, Sept. 9 (UPI) -- South Korean companies are trying to weather the prolonged slump in the global battery industry by partnering with leading corporations in Europe and the United States.

Are Korean battery companies still a blessing in a time of need?

By contrast, demand has stagnated in Europe and the United States -- key markets for Korean battery companies. "For LG Energy Solution and SK On, the recent contracts are a blessing in a time of need. But, they will still have to endure hard times a few more years," Daelim University automotive professor Kim Pil-soo told UPI.
